

1. **Addenda:** The following items are to be included and this addendum forms part of the Tender Documents.

2. **Clarification:**

- .1 The Lump Sum Price Proposal included in the tender documents inadvertently had the "Pre-Select" equipment value which does not pertain to this project. **Replace** with attached Form.
- .2 The building contractor is not responsible to provide for any mechanical equipment or components. The infrastructure project contractor (Dexter / Black & McDonald) are responsible for provision of equipment, piping, ductwork, louvers, and appurtenances. However the co-ordination regarding wall openings, rough framing, and penetrations to accommodate such are a mutual responsibility.
- .3 Electrically however there are elements which generally summarize as:

Martock

- i) Technical building and Finish Hut electrical are all within this contracts responsibility.
- ii) Compressor/Pumphouse building and River Pumphouse building general building services such as lighting, receptacles, and space heating are within this contract. Provision of transformer/service entry, MCC, power distribution, equipment termination, and control equipment, instrumentation, and control wiring are outside of this contract. Co-ordination between the two contracts is however essential.

Wentworth

- iii) Finish Hut electrical and the Summit 600v receptacle are in this contract.
  - iv) Compressor building lighting, receptacles, and space heating are within this contract. Provision of transformer/service entry, MCC, power distribution, equipment termination, and control equipment, instrumentation, and control wiring are outside of this contract. Co-ordination between the two contracts is however essential.
- .4 This addenda does not provide for any extension to the closing date of Monday June 1, 14:00.
